

## BLAINE BROTHERS OFFERS CLEANING AND TESTING SOLUTIONS FOR YOUR DIESEL PARTICULATE FILTER (DPF)

Cleaning your DPF is all about increased performance. A diesel particulate filter is a device that is used to remove grime and soot from the exhaust gas of a diesel engine. If these parts are gummed up, your engine's performance will suffer.

Blaine Brothers provides quality filter cleaning, at a reasonable cost using proven technology.

Keeping your trucks on the road is critical to your success as a company. The DPF filter can sometimes be overlooked when maintenance time rolls around. Frequent DPF filter cleaning is a critical element in making your trucks safe and productive. Our trained technicians perform DPF cleaning so you know the job is done right. Cleaning the DPF filter will increase fuel economy, increase performance & horsepower, lower downtime and lower maintenance costs. Let us show you the value and results proper DPF can offer!

- Increased fuel economy
- Increased engine performance & horsepower
- Minimal fleet business interruption
- Fewer regenerations
- Longer DPF life
- Optimized DPF performance
- Extended cleaning intervals
- Lower overall maintenance costs
